TYLON FLOORS

SHOWER SCREENS

BATH SCREENS

ultimate shower screens compatible with Tylon™ Shower Floors

Features

The Ultimate Shower Screen was so named because we believe it is the optimum in shower screen design.

It has the looks of a frameless glass screen, and the practicality of a semi-frameless screen.

The Ultimate Shower Screen is essentially a frameless glass screen with chrome plated solid brass hinges and handles.

However rather than a unsightly glass head brace, it incorporates small continuous head and sill rails (10mm deep) to brace the screen, and significantly improve water containment.

Benefits

- Produced in standard sizes to fit Tylon™ Shower Floors, Tylon™ Plinths and other applications.
- Standard sizing enables efficient production which is passed on in competitive prices.
- Ultimate Shower Screens are configured with the door hinged off a fixed panel. This has several advantages:
 - the door handle is kept away from the wall in the open position
 - allows the use of towel rails behind the door when open
 - shower access is away from the shower head
- A new innovative "shelf style" door splash strip, combined with the small sill rail for excellent water containment
- The sill under the door can be removed for level entry if required, and a special splash strip supplied.

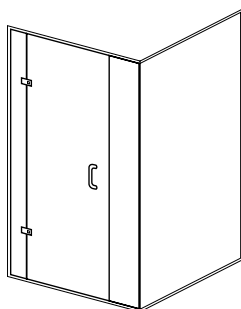

Specifications

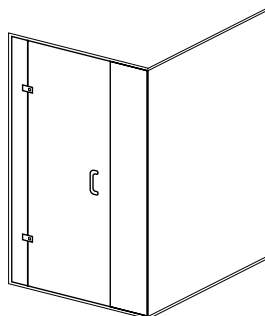

Wall channels and rails	Alloy 6060 TS bright anodised silver
Hinges	Forged solid brass with bright polished chrome plating
Handles	8" D handles both sides formed of brass tube with bright polished chrome plating
Toughened Safety Glass	6mm to AS/NZS 2208, NZS 4223/99
